The History of JS

TIMELINE

1995
JavaScript is Born
Created by Brendan, a Netscape Communication programmer. It took Eich 10days to develop the scripting language which was then known as Mocha
The scripting language's from Mona (and LiveScript) to JavaScript

1996
JavaScript is handed to ECMA
The scripting language was officially given name 'ECMASCRIPT' however people still call it JavaScript

2005
EICH and Mozila join ECMA
This was to assist with E4X leading to a collaboration with macromedia who were working to implement E4X in ActionScript3

2008
Involved parties come together in Oslo
This results in the agreement to drive the language towards using an agenda known as Harmony(ES6)

2009
The CommonJs project is created
This results in the agreement to drive the language using agenda known as harmony

2016
93% of all website use JavaScript

Features Of Javascript

Asynchronous

single-threaded PL

one thread
